

CytoFLEX ^{NEW} LX series Roadshow

Dear Cytometry-Community,

The CytoFLEX Platform is a revolutionary system presenting optimal excitation and emission, minimizing light loss and maximizing sensitivity. This means that you can easily detect dim population in your sample. And all with an easy to use and powerful analysis software interface. We are excited to present with the brand new CytoFLEX LX another expansion bringing five and six laser options to the CytoFLEX platform in today's event. The unique performance of the Cytoflex LX will be demonstrated using DuraClone dry antibody panels, our pipetting-free 7-10 color "backbone" solution for your high content cytometry assays.

Too good to be true....? Check it out yourself by attaining the CytoFLEX Series Roadshow event in Toulouse !

We hope to see you on our CytoFLEX Road Show !

FLOW CYTOMETRY
INVITATION 2017

LONDON

TOULOUSE

REGISTRATION
2017

MANCHESTER ABERDEEN NEWCASTLE GRIMSBY BIRMINGHAM

Jeudi 22 Juin 2017 – 9h30

Centre de Physiopathologie de Toulouse Purpan (INSERM U1043 CPTP)

Agenda :

Matin (Salle P.DRUET, rdc Bât A du CPTP) :

- 9h30 – 10h : Petit déjeuner
- 10h – 10h30 : Nouveautés Beckman Coulter
- 10h30 – 12h : Présentation du CytoFlex LX

Après-midi (Plateau technique de Cytométrie et tri cellulaire, Bât F 2e étage du CPTP) :

14h – 17h :

- Démonstration
- Billes 8 pics
- Tube Duraclone T Cells 15 couleurs
- Tube Duraclone Immune Fonctional (T activation)
- Tube Gigamix
